

Profile

ABOUT

Toner, a firm on the Turkish architectural scene for three generations, was built by Prof. Süha Toner. Prof. Toner was a leading academic figure as the founding President of the Yıldız Technical University. One of the founding members of Turkey's first large architectural firms, IMA, he was working alongside Abdurrahman Hancı, Turgut Övünç and Affan Kırımlı.

Toner continued its legacy with the second generation. Mustafa Toner, empowered with his father's business etiquette, brought contemporary knowledge and technical expertise to the firm, and cultivated long lasting business collaborations. After his graduation from the Mimar Sinan Fine Arts University his many contributions to the architectural scene involved multiple large-scale local and international projects. Mustafa Toner continues to provide concept development, architectural design and project drafting and implementation services to an ever-growing clientele at the family run architectural practice 'Toner'.

The practice entered a new era in 2011 with the addition of its third generation. Emre Toner joined the firm after completing his education in economics at Tufts University and interior design at the Rhode Island School of Design (RISD).

Mustafa Toner and his son Emre Toner have focused their creative energies to mold existing collaborations to new projects using professional, technical and social experience and provide a deeply rooted knowledge for cultivating new collaborations within a tradition of architecture that has been continuing to grow for the past three generations.
